## Deisal

## Name: Deisal Sex: Male Age: 12 months <br> Breed: German Shepherd x Kelpie

Deisal has been in care for some time now. Originally
 he came from a pound after he had been tied up to a clothes line and a whip was cracked at the time every time he barked, and I would say by a male as he now very wary of men. He takes a while to warm to new people but once he does he is a great companion. It has taken a long time for him to adjust to being a dog but he is super friendly to his foster mom and is getting better with the foster dad but he is just the best dogs with other dogs. He can socialise with any dog so I often will socialise him with dogs that we are not sure about and he brings the best of them.

He loves his food so is easy to train. He is crate trained and house trained although he will still have the odd accident. He is great on the lead and getting better in the car but when he is out he does get a little anxious at times. Deisal will need to go to a home where they have the time and patience to let him settle in and another dog that likes to play. He seems to learn off other dogs and follow them although now he is used to his foster home he is quite confident.

## Adoption Fee: \$350

All dogs rehomed through WDR are vet checked, desexed, microchipped, C5 vaccinated, flea treated, wormed and registered with Wodonga Council
